

AMENDMENT

It is respectfully requested that the application be amended without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents, as follows.

IN THE CLAIMS

Please amend the claims, without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents, as follows:

F1
1. (Five Times Amended) A composition for reducing viral load of porcine circovirus-2 (PCV-2) in a pig comprising a pharmaceutically or veterinarily or medically acceptable carrier and an active agent comprising a vector containing and expressing an exogenous nucleotide sequence, wherein the nucleotide sequence encodes PCV-2 ORF4, PCV-2 ORF13, or PCV-2 ORF 4 and ORF13.

2. (Four Time Amended) The composition of claim 1, wherein the vector contains and expresses PCV-2 ORF4 and ORF13.

F2
21. (Four Times Amended) The composition of claim 1, additionally including at least one immunogen from at least one additional pig pathogen, or a vector expressing such an immunogen, wherein the vector expressing the immunogen can also be the vector expressing PCV-2 ORF.

24. (Four Times Amended) The composition of claim 1, wherein the vector contains and expresses PCV-2 ORF4.

F3
25. (Thrice Amended) The composition of claim 1, wherein the vector contains and expresses PCV-2 ORF13.

F4
50. (Four Times Amended) The method of claim 31, additionally including at least one immunogen from at least one additional pig pathogen, or a vector expressing such an immunogen, wherein the vector expressing the immunogen can also be the vector expressing PCV-2 ORF4, PCV-2 ORF13, or PCV-2 ORF 4 and ORF13.
